## EXPERIENCE

### ORACLE SOLUTION SERVICES

August 2024 – Present

*Associate Consultant, CSS GSC TechCloud*

*Bengaluru, Karnataka*

- Led **0→1** development of Talk2Data, an AI-powered conversational layer over Oracle's Third-Party Labor (TPL) platform, transforming time-intensive and error-prone manual profile management for **10K+ users** by enabling natural-language search, add, edit, and delete actions across **5K+ daily queries**.
- Owned end-to-end UAT and release readiness across multiple enterprise product launches, translating business requirements into test scenarios, prioritizing critical issues, and driving stakeholder sign-offs, achieving **zero post-launch critical defects**.
- Designed and built a GenAI-powered test case generation product that converts document inputs into actionable test cases using LLMs, reducing manual test case creation effort by **60%** and accelerating test planning and release preparation.
- Led the modernization of an internal security platform serving **5,000+ users**, migrating the legacy application to Oracle APEX 24.2, redesigning key workflows and prioritizing enhancements based on user feedback, resulting in a **30%** increase in user adoption.
- Built a data-driven quality analytics product leveraging **5,000+** historical Oracle projects to track Defect Removal Efficiency (DRE) and predict defect risk using ML, improving projected **DRE by 20%** and enabling data-driven quality planning.
- Automated the employee signature process for an organization of **27,000 employees**, replacing manual workflows with a streamlined digital process, reducing turnaround time by **40%** and significantly lowering manual effort across the organization.

## PROJECTS

### Digital Therapy Hub

Mar 2026

- Designed and built an end-to-end health support platform serving 2 core user segments - patients and doctors, enabling appointment discovery, booking, and consultations while streamlining the care journey and improving user adoption by **40%**.
- Designed a data-driven risk assessment feature to classify patient risk levels with **90% accuracy**, enabling doctors to prioritize high-risk cases and support earlier intervention through personalized care workflows.

### AI Personal Finance Assistant

Jan 2026

- Designed and built an AI-powered personal finance product for young professionals, enabling automated expense tracking, personalized budgeting, and spending insights while reducing manual expense management effort by **45%**.
- Defined the MVP roadmap and prioritized **15+** user stories using user feedback and **6+** product KPIs, optimizing key user journeys and driving a **35%** increase in feature adoption.

## EDUCATION

### Vellore Institute of Technology

Jun 2024

*B.Tech in Computer Science*

*CGPA: 9.00*

## SKILLS

**Product Management & Execution:** Product Discovery, Requirement Gathering, PRD, User Stories, Roadmapping, Feature Prioritization, A/B Testing

**Data & AI:** SQL, Product Metrics, Google Analytics, Machine Learning, GenAI, LLMs, Power BI, Microsoft Excel

**Tools:** JIRA, Figma, SQL Developer, Claude, Codex, Lovable

## ACHIEVEMENTS

- Awarded **YES Award** at Oracle for demonstrating strong **accountability and ownership** in product delivery.
- Achieved **Regional Finalist** position in **MadHacks** (Oracle Global Hackathon) - led ideation, scoping, and pitching of a product solution among multiple competing teams.
